UNION IRON & STEEL CO. LLC

MADE IN UAE

SCS Performance Statistics 2024

A low-angle photograph of a tree trunk, looking up towards the canopy. Two hands are resting on the bark of the tree trunk, symbolizing a connection to nature. The background is filled with green leaves and branches, creating a sense of a lush forest.

Sustainability

[suh-stey-nun-bil-i-tee]

- The ability to be maintained at a certain rate or level.
- To create and maintain the conditions under which humans and nature can exist in productive harmony to support present & future generations.
- Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Union iron & steel executed sustainability Objectives & Targets for 2023:

Contribution to local Economy:
Increase the local purchasing.

GWP & GHG:
Reduce GHG emissions
from process and transport.

Waste Management:
Increase waste recycling.
Reduce waste to landfill & incineration

Community initiatives:
Increase community initiative

Safety Culture & Wellbeing:
Minimize Occupational Injuries, Accidents, Incidents to achieve zero LTI.
Reduce fire and traffic incidents

Local Employment:
Increase employees/contractors
from local community/area.

Training & Competency:
Increase Health, Safety, Sustainability & Environmental
awareness training hours.

Biodiversity:
Increase biodiversity rich habitats.

Water use:
Increase water recycling and reduce water usage.

Energy Intensity:
Reduce energy intensity.

An aerial photograph of the Dubai skyline at dusk. The Burj Khalifa stands prominently in the center. To its left is the BurjDubai. In the foreground, a complex multi-level highway interchange is visible, with several skyscrapers under construction marked by cranes. The sky is a clear blue, and the city lights are beginning to glow.

Transport Impacts Annual Summary

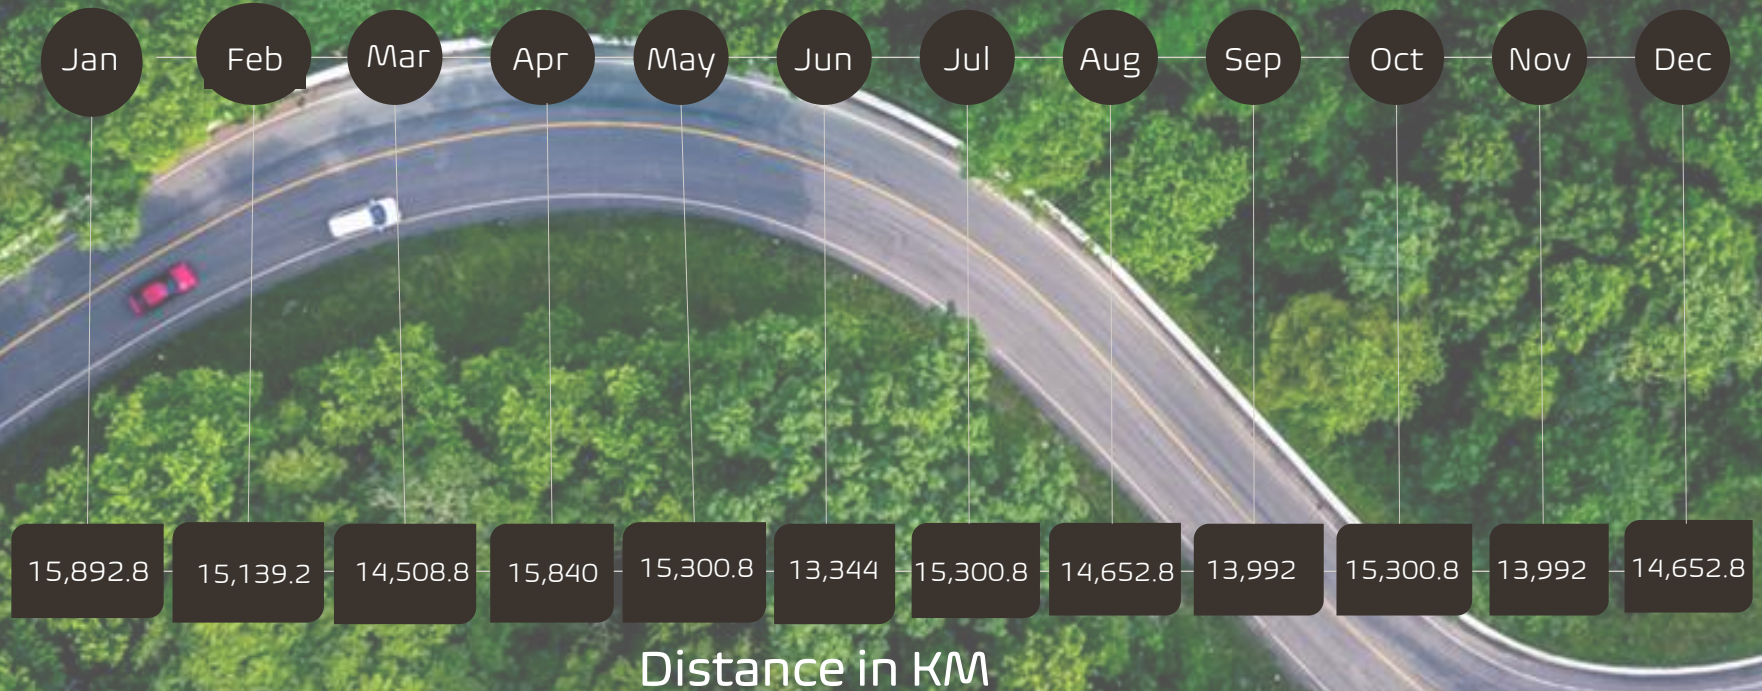

Introduction

The environmental impacts of transport are significant due to major use of energy and natural resources (e.g., petroleum). This creates air pollution, including nitrous oxides and particulates and is a significant contributor to global warming through emission of CO_2 . Transport impacts can also include nuisance impacts on the local community such as dust, congestion and health and safety risks. Transport impacts shall be monitored and reduced.

Transport Impacts (Employees) :-

Monitoring and reducing impact of employee travel can benefit communities and help support the transition to net-zero.

Transport Impacts (Business Travel) :-

Monitoring and reducing impact of Business travel can benefit communities and help support the transition to net-zero.
